
**In 2006, the Town of
Glastonbury pledged to
use CLEAN energy for 20%
of its electricity needs
by the year 2010.**

**We are on track to meet this commitment
through the purchase of Renewable
Energy Certificates (RECs) from
Community Energy, Inc.**

- **3,710 Megawatt-hours of CLEAN energy
have been used through 2009**
- **2,900 tons of CO₂ emissions avoided**
- **Equal to annual CO₂ emissions from 370
homes or 488 passenger vehicles!**
